

## OBS: RBA Risk Benefit Assessment

**Activity:** Tyres and Loose Parts

**Benefits:**

- We can make lots of wonderful things using the tyres and loose parts.
- We can have fun and explore different materials and objects.
- We can be creative.
- We can work collaboratively as a team.
- We can try new things.
- We can take risks in a safe way.

**Activity Ideas:**

- We might want to make a fort.
- We might want to make an obstacle course.
- We could play 'floor is lava'
- We could make a hopscotch course.
- We might want to make vehicles.

**Risks:**

- We could hurt our bodies rolling in the tyres
- We could fall from a crate and hurt ourselves
- We could hit someone with a pipe or plank of wood if not carried carefully
- We could trap our fingers between crates and planks
- We could get stuck inside a tower of tyres
- We could hurt others if we transport the loose parts and tyres to other areas outside.

**Risk Management:**

- We will not roll ourselves or others inside the tyres
- We will not stack more than two tyres on a tower
- We will not stack more than two crates
- We will not throw the tyres
- We will not roll the tyre at people
- We will not hide ourselves in the tyres
- Tyres must stay on the designated area on the field to keep us safe
- We will carry the planks of wood safely and vertically
